

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

2. Listing of Claims:

1.-39. (Cancelled)

40. (Currently Amended) A method for controlling the distribution of information from an information provider processor to a plurality of recipient processors on a communications network, based on the geographic locations of the recipient processors, the method comprising:

associating a respective positioning system with each respective recipient processor for providing location information to the associated recipient processor;

receiving location information from ~~the positioning system associated with a given~~ each recipient processor, the location information corresponding to the general geographic location of the ~~given~~ recipient processor from which the location information is received;

determining, from the location information, whether the geographic location of the ~~given~~ each recipient processor from which the location information is received is within a predefined location or region;

requiring predefined additional information before providing ~~the given~~ each recipient processor with determined to be within the predefined location or region access to first information ~~in the event that the given recipient processor is determined to be within the predefined location or region;~~ and

providing ~~the given~~ each recipient processor not determined to be within the predefined location or region with access to first information without requiring the predefined additional information ~~in the event that the given recipient processor is not determined to be within the predefined location or region.~~

41. (Currently Amended) A method as recited in claim 40, wherein requiring additional information comprises communicating a query from the provider processor to ~~the given~~ each

recipient processor determined to be within the predefined location or region for the additional information.

42. (Previously Presented) A method as recited in claim 40, wherein requiring additional information comprises user age information.

43. (Previously Presented) A method as recited in claim 40, wherein the additional information comprises payment information.

44. (Previously Presented) A method as recited in claim 40, wherein the additional information comprises a user indication that a waiver, license or disclaimer is accepted.

45. (Previously Presented) A method as recited in claim 40, wherein the additional information comprises current time information.

46. (Previously Presented) A method as recited in claim 40, wherein the additional information comprises user identification information.

47. (Currently Amended) A method as recited in claim 40, wherein receiving location information comprises receiving location information over the network by the provider processor and determining comprises determining, by the provider processor, whether the geographic location of ~~the given~~ each recipient processor is within a predefined location or region.

48. (Currently Amended) A method as recited in claim 40, wherein receiving location information comprises receiving location information by ~~the given~~ each recipient processor and determining comprises determining, by ~~the given~~ each recipient processor, whether the geographic location of ~~the given~~ that recipient processor is within a predefined location or region.

49. (Currently Amended) A method for controlling the distribution of information from an information provider processor to a plurality of recipient processors on a communications network, based on the geographic locations of the recipient processors, the method comprising:

associating a respective positioning system with each respective recipient processor for providing location information to the associated recipient processor;

receiving location information from ~~the positioning system associated with a given each~~ recipient processor, the location information corresponding to the general geographic location of the given recipient processor from which the location information is received;

determining, from the location information, whether the geographic location of ~~the given each~~ recipient processor from which the location information is received is within a predefined location or region;

requiring predefined additional information before providing ~~the given each~~ recipient processor with determined to be within the predefined location or region access to first information ~~in the event that the given recipient processor is determined to be within the predefined location or region;~~ and

providing ~~the given each~~ recipient processor not determined to be within the predefined location or region with access to second information without requiring the predefined additional information ~~in the event that the given recipient processor is not determined to be within the predefined location or region,~~ wherein ~~the~~ one of the first and second information is a partial access but not full access to a product or service and the other of the first and second information is full access to the product or service.

50. (Currently Amended) A method as recited in claim 49, wherein requiring additional information comprises communicating a query from the provider processor to ~~the given each~~ recipient processor determined to be within the predefined location or region for the additional information.

51. (Previously Presented) A method as recited in claim 49, wherein requiring additional information comprises user age information.

52. (Previously Presented) A method as recited in claim 49, wherein the additional information comprises payment information.

53. (Previously Presented) A method as recited in claim 49, wherein the additional information comprises a user indication that a waiver, license or disclaimer is accepted.

54. (Previously Presented) A method as recited in claim 49, wherein the additional information comprises current time information.

55. (Previously Presented) A method as recited in claim 49, wherein the additional information comprises user identification information.

56. (Currently Amended) A method as recited in claim 49, wherein receiving location information comprises receiving location information over the network by the provider processor and determining comprises determining, by the provider processor, whether the geographic location of ~~the given~~ each recipient processor is within a predefined location or region.

57. (Currently Amended) A method as recited in claim 49, wherein receiving location information comprises receiving location information by ~~the given~~ each recipient processor and determining comprises determining, by ~~the given~~ each recipient processor, whether the geographic location of ~~the given~~ that recipient processor is within a predefined location or region.

58. (New) A method as recited in claim 40, wherein:
requiring additional information comprises requiring predefined additional information before providing each recipient processor determined to be within the predefined location or region partial but not full access to first information that corresponds to a partial but not full access to a product or service; and

providing each recipient processor not determined to be within the predefined location or region with access to first information comprises providing those recipient processors with full access to first information without requiring the predefined additional information, where the full access to first information corresponds to full access to the product or service.

59. (New) A method for controlling the distribution of information from an information provider processor to a plurality of recipient processors on a communications network, based on the geographic locations of the recipient processors, the method comprising:

associating a respective positioning system with each respective recipient processor for providing location information to the associated recipient processor;

receiving location information from each recipient processor, the location information corresponding to the general geographic location of the recipient processor from which the location information is received;

determining, from the location information, whether the geographic location of each recipient processor from which the location information is received is within a predefined location or region;

requiring predefined additional information before providing each recipient processor determined to be within the predefined location or region access to first information; and

providing each recipient processor not determined to be within the predefined location or region with access to second information without requiring the predefined additional information, wherein the first information is a partial access but not full access to a product or service and the second information is full access to the product or service.
